GLOSSARY

Scrubbing Type

The type of scrubbing you chose prior to receiving this report.

Start Time

The exact time you hit the submit (start scrubbing) button.

End Time

The timestamp when the file was completed.

Bot Clickers

Malicious computers that programmatically open emails and create false clicks.

Hard Bounces

Matched and removed against 100 million verified hard bounces.

Complainers

Consumers or businesses that have complained directly to the ISP (not related to any report spam buttons).

Departmental

These are emails related to departments in business. i.e. info@test.com or webmaster@test.com.

Blacklisted

Matched and removed against domains that are spam traps, complainers, litigators and other proprietary threats.

Foreign Domains

Matched and removed against international domains. i.e. test.com.ar or test.com.ru.

HAMY Traps

Matched and removed against 8.5 million hotmail, aol, msn, yahoo (all large email providers) spam traps and spamcop traps.

Threat Endings

Matched and removed against federal, state, local governmental email addresses and other proprietary threats.

Threat String

Matched and removed against known strings inside emails that are related to malicious entities.

Legacy 1999

Matched and removed against consumers who do not want to receive advertisements since 1999 (opt-out suppressions).

Legacy 2006

Matched and removed against consumers who do not want to receive advertisements since 2006 (opt-out suppressions).

Advisory Traps

These are spam traps that our system removed from matching spam fighter IPs in the mx scrubbing option. For a detailed explanation on each spam advisory, go to http://www.ehygienics.com/spam-advisory/
